

**It's Like "West Side Story!" The Generics Are Moving In On The Major Drug Companies Turf To Grab the Big Bucks From The Largest Aging Population In America!**

**After the Dust Settles There'll Be *Winner\$...and Losers!***

## **And One Off-The-Radar "Little Over Seas Company" With Revolutionary Bio-Technology Is Going Capitalize No Matter What Happens!**

Welcome to Global Investing,

NO ONE ever thought it would happen! *Hell, they never thought it would happen.* But, it has. President Bush, Cher, "The Donald" and many other Baby-boomers have turned the "BIG 60!" *In fact, Boomers are turning 60 in this country at the rate of 8000 a day.*

They rocked to "The Rolling Stones"... they started a civil rights movement... they protested for peace across college campuses... but NOW as they move into retirement age (Yikes!) they WANT reasonably priced prescription drugs to take away their aches, pains, and illnesses.

*But here's the problem:* The US – and for that matter any other country – cannot continue to pay current drug prices. In the last 4 years, the Medicare costs have risen 3.51% per year per beneficiary.

And just like in "West Side Story", a major turf war is going on between the big pharmas (The Sharks) and the generic makers (The Jets) who are "movin' in on their action." (Thanks to the 1984 Hatch-

**Yours FREE!**

Waxman Law, passed to protect the Generics).

Not to mention that a few of these upstart generics are located overseas which is really upsetting the domestic big boy drug companies.

As you might know the defensive drug shares have not done as well as other sectors since the industry was spooked by Hillary Clinton. **Smart investing means you should look for potential out-performers in sectors that are lagging. Now is the time!**

And mark my words: no matter what happens this little known Israeli company (which I'd bet anything your domestic broker is clueless about)...is going to help certain generic and big pharma companies gobble up "Baby Boomer" market share for decades to come!

You see, they're developing genomic and proteomic technologies to aid the drug discovery process. These are the most compelling areas that science deals with in their relationships to disease.

What they have discovered is a bunch of proteins which affect the human cell. These particular proteins are good candidates for treating diseases which cause havoc within the cell: everything from arthritis, diabetes, cancer, multiple sclerosis, to heart disease and strokes.

They do all of this with LEADS. Now, a LEAD is exactly that, a lead toward a drug which can cure diseases. This is why drug companies like Abbott Labs, Pfizer, and Novartis. (as well as the generic makers) are chomping at the bit to get their mitts on this.

They desperately want a way to screen lots of proteins to find ones which have an active role in linking to cells. Then they can test them quickly and cheaply against the bad stuff. In essence they are looking for a lock that --- bingo -- a key will fit into.

"Time is of the essence. Let me send you my Pharma Report, FREE (Over \$100 Value) on how this remarkable company can deliver a **TRIPLE** to the shrewd investors who get in now!"

~ Vivian Lewis  
Editor, **Global Investing**

**Subscribe Now**

The niche company's 80 scientists have a huge pedigree of math and science credentials and "walk the walk and talk the talk." If their methods can be directional for the big pharmas (to avoid wasting time or money when researching compounds, reactions, and effects)...**then this company is going to be a small gold mine to a drug major which could easily make an outright purchase or big cash deal for it!** (Its stock is so beaten down creates an enormous buying opportunity for us)

With these strategic alliances it'll allow this company to grow—or it will make them indispensable and therefore worthy of absorption. (Win-win, either way.)

Listen: this is the tip of the iceberg. I need to give you "The Full Monty" of what's really happening in the pharmaceutical industry. I also want to give you the three specific criteria I've used as to why I think this remarkable company **can be a triple bagger in the coming year.** (But you have to get in now!)

Because timing is everything – I want you to have the whole story so you can make the prudent decision as to whether you should invest in it.

The eye opening report is **Global Investing's Pharma Giants vs. Generic Makers: Stocks that Will Pop and Stocks that will FLOP!**

Please give me just ten minutes...read my letter in its entirety...so you can discover how to get this in depth information absolutely FREE!

Allow me to introduce myself: I'm **Vivian Lewis**, editor of **Global Investing**, and I proudly bring a unique experience and competence to the business of picking foreign stocks. I am a Harvard Magna cum Laude graduate.

While in Europe I worked for *Business Week* in Brussels, *The Economist*, then *The Sunday Times* (of London) in Paris. Then I moved to the U.S. and used my expertise to work for first the *Joint Economic Committee* and then for the *U.S. Senate Foreign Relations Committee*.

After that ended my journey took me back to Paris where I wrote for the financial powerhouse financial publisher *Euromoney* and then for *Institutional Investor*. Also during that time I wrote for *The International Herald Tribune* and *The Banker*.

Then I moved back to the U.S. Once there, I went to my former institutional employers with the idea of continuing my analysis of foreign markets. Well, guess what? Missing the opportunity to make loads of profits for their

investors— they passed. Back then, they “just didn’t get it.”

**Well, their loss is your gain. Why? That was when I decided to go on my own and deal directly with the investor who could profit from my in depth research: You, the retail customer.**

And thus I began Global Investing!

Please understand that I just gave you my background NOT to impress you, but to impress upon you that regardless of US market conditions—I have the ability to help put you on the road to financial independence with exciting overseas opportunities.

The reason? I live, eat, and breathe the international investment arena.

Armed with a “who’s who” rolodex of major contacts that I painstakingly garnered through decades of living abroad, (and the fact that I speak a half-dozen languages), I’ve been doing it quite productively for over eighteen years with **Global Investing**. But here’s a...

**WARNING:** If you’re looking to read a dull, boring, “just the facts” investment newsletter that’s dryer than a raisin in the sun... this AIN’T IT!

Investment guru’s, journalists, and my loyal subscribers who have followed me over the decades know I don’t mince words with my musings and editorials. Simply put: “I calls it as I sees it.” Sassy, brassy, a curmudgeon... call me what you want.

**But one thing you won’t call me is boring. The bottom line is: I can help you make some serious money with overseas equities, bonds, and closed end funds.**

Here’s the unvarnished truth. Research and analysis of over seas markets in my life’s work and I want to pass this knowledge on to you. (Not to mention I love putting the good old boys of Wall Street to shame).

Let me show you how to beat “The Street” and avoid financial risk by investing in my legendary portfolio of international stocks, bonds, and funds. Which I might smugly add has earned **Global Investing** readers who participated with us...**a remarkable 35.8% 5-year average gain! (Ch-Ching!)**

And many of our winners have been massive home runs—as much as 1890% on a single recommendation. Picture yourself right now getting those same returns. Can you imagine how these could effect your financial future?

- **1247.90%** - Niko Resources (NKO – Toronto)
- **893%** - Tenaris (TS - NYSE)
- **111.16%** - SGL Carbon (SGG - NYSE)
- **280.69%** - Vestas (VWSYF - OTC)
- **1890.52%** - BWT (BWTAF-OTC)
- **351.59%** - Norsk (NHY- NYSE)
- **310.20%** - Cia Vale Rio (RIO - NYSE)
- **303.64%** - Infosys – (INFY- Nasdaq)

## “Sssh!” Here’s the Secret to Safely Diversifying Your Investments for Maximum Gains

First off, you’re busy, and I am busy...so let’s get down to the “nitty gritty.” So called investment pundits say that international investments are risky. Well, apparently they’re clueless about what earning real wealth over seas is all about.

And I’ve been proving them wrong for almost 40 years. In fact, I and my readers have been making out like bandits for over a decade by avoiding the Wall Street herd—while at the same time reducing our risk. (And isn’t that what it’s all about?)

Think I’m exaggerating? Well, I wouldn’t blame you...so let’s look at this logically, and you’ll immediately see how this all makes perfect investing sense.

In the world economy, different regions and countries undergo their own unique cycles. Every person on this planet goes through the same thing. Is your life linear? No, of course not! Does everything go your way—every day? Of course not! (And if it does...please send me your secret via e-mail)

Well, it’s the same with the world

### Where to invest?

" I expect the EU countries to post significant U.S.-style growth this year. Moreover, they will do so during a period of rising interest rates, as we did in 2005. While not necessarily a bellwether for stock markets, the jump in European merger-and-acquisition levels is...a marker of rationalization and openness. This will be good for European bourses, along with changes everywhere from the Bank of Italy to the Kremlin..."

financial markets. And as much as I love America, and as proud as we all are that ours is the bellwether for the global economy... guess what? The USA is NOT the only place to make serious money! NOT by a long shot!

~ Vivian Lewis

[Subscribe Now](#)

When the U.S. is in recession, Europe can be in recovery. When Europe is going through some “drama”, the Asia-Pacific region can be going like gangbusters. Economies and markets are and will always be cyclical. It's the nature of the beast!

## **Think The Only Way To Build A Nest Egg Is To Invest In Domestic Stocks? *Well, Think Again!***

The simple truth is: The “Secret” to getting HUGE gains overseas is to do one’s diligence with every investment opportunity (over seas or domestically) that comes your way (as if your financial life depends on it—and it usually does correct?)

So what does this all mean to your portfolio? It means this is where I put the “pedal to the metal.” Like an investment bloodhound, I prudently track global economic conditions--and sniff out the trail of inside information of the best investments to safely put your money into.

I’ve proven it year after year, that YES—you CAN beat the cycles and keep growing your money!

But there’s a rub—and it’s quite ironic, because I’ve found that most domestic investors don’t use this one simple strategy. They don’t diversify!

Only in this case, I’m not talking about just diversifying into various types of instruments (stocks, bonds, mutual funds, and so on) or just into different industry sectors. **No. I’m talking about diversifying in whole economies across the world.**

And I’m not the only one preaching to get on the overseas gravy train. Apparently others are getting the message loud and clear. And here’s an important stat to prove it. **Mutual Fund Tracker Letter reported that half of new money flowing into mutual funds was going to—you guessed it—global stock portfolios.**

And of the nearly \$5 trillion in equities held by U.S. mutual fund investors, 17% now is in funds holding foreign stocks. **That is double the level at the start of the millennium.**

## Opportunities in other Markets

“While the United States market is pretty well correlated with the world as a whole, it is less correlated with individual foreign markets -- and that's an opportunity for diversifying your risk. Broadly speaking, most U.S. stocks will go up in a bull market and down in a bear market. But history shows that during a given time period, shares in Finland or Japan can be performing in opposite directions”

- **Stephen D. Simpson, CFA,**

“Interest in foreign investment has been high among US investors in recent years. The unprecedented growth of 401k pension plans has greatly increased the number of people who must make their own investment decisions. Many investors know that geographic diversification can improve investment returns without increasing risk.”

- **Katrina Simons, Senior Economist, Federal Reserve Bank of Boston**

Need further proof? Then you only have to see what Warren Buffet was up to last year. Even “The Oracle of Omaha” committed to broadening his international exposure. He stated he wanted Berkshire Hathaway Inc. to make more investments overseas with targeted areas such as Europe and Japan having the most potential.

Mr. Buffet recently made his first overseas investment and purchased 80 percent of Israel's Iscar Metalworking Cos. (in a transaction valuing the closely held tool firm at \$5 billion.) Not only that, but Americans are going to continue to “go global” to gain more returns than they might at home.

This is NOT just based on my opinion but on actual market research. Impressively, according to the etrackers of AMG (quoted in Financial Times), of the net \$123 billion invested in US equity and exchanged–traded funds last year; **no less than 88% of new money has gone into funds which invest overseas.**

**Subscribe Now**

By now you're probably wondering how I do it year after year...decade after decade. Well, it's surprisingly simple:

## I Dig Deep to Unearth the Real Story of What's Happening With An Overseas Company...

*Please remember this point:* I am (and shall always be) a financial journalist.

I have a strong sixth sense and suspicion about anything that is presented to me as a great “golden opportunity.” That’s why I always dig deeper and really investigate whatever I am being fed— so I can determine the reward/risk to the buyer (you!)

Wondering how I pick my consistent winners? Well, I use a three step method.

1. I do my homework researching the companies involved.
2. I get to know their business strategies, their top people and management practices, PLUS investigate the specific industries they’re in and the market domination they hold within that industry.
3. And most of all (drum roll, please) I put their balance sheets under a microscope.

Make no mistake: to do the job I do, it’s not only important to “know what you know” **But “whom you know.”** I have deep connections within the worldwide investment community (especially in Europe), plus an army of paid reliable financial journalists from around the world! (Israel, Mexico City, Argentina, China, India, South Africa, and Japan)

Not only that, but I’m also able to mine personal relationships with heads of companies, investors, government economic officials, and financial editors. And it’s precisely why we are...

## Up 3125.23% And The Best Is Yet To Come...

...with one particular (long term holding) overseas company that’s rapidly changing the pharmaceutical industry: **Teva Pharmaceuticals**. We recommended **Teva** (TEVA-Q), an Israeli company, in 1991. I was introduced to this remarkable company by a financial analyst working for the Groupe Edmond de Rothschild, a Swiss money manager to the rich, who compared it to Ciba Geigy. Not only did I do my usual due diligence on **Teva**, but on my next trip to Israel I cornered the CFO with some tough questions. I got the answers I wanted... liked what I heard... and the rest as they say is history

Since then, it's gained—**ready for this? 3125.23%! (this includes cost adjustments for splits) Yes, it's been a winner for us from the git go! (You'll learn more about TEVA in my FREE report.)**

Let's go south of the border...way south. **Companhia de Saneamento Basico do Estado de Sao Paulo** (SABESP NYSE-SBS)

This environmentally friendly Brazilian water and sewage company (it's won major awards for this) is the largest in the Americas—and third largest in the world.

And just look at this combination: **water + sewage = MUCH green dinero for its shareholders and for my readers who were fortunate to get in at \$18.78 now have a lofty return of 73% (PLUS a nice yield of 3.50%)**

Wait! Don't unpack yet...we're headed back to Europe with one of my long time favorites. It has 80,000 employees with colossal assets of \$120 billion. Interested in an established company with the reassurance of Scandinavian ethics and experience that also has a winning formula capable of rising above the continent's sluggish economies? Then look no further than **Volvo (ADR VOLVY)**.

Wait! There's more to the story: Analysts are getting calluses on their fingers from having to recalculate their estimates on Volvo's phenomenal growth. Consider the trend in earnings per share over the past few years. EPS for 2002 was 0.39...in 2003: 1.39, and 2004: 2.88. I think you'll agree this company is NOT your "Dad's General Motors."

Volvo has now grown into one of the leading manufacturer of specialized trucks and construction equipment, too. **Slow and steady wins the race with this Swedish stalwart stock, because since '05 it's given us a very respectable gain of 100%**

Impressed? I hope so! Have we had a few clunkers? Sure, no one's perfect. (Like Kenny Rogers sings "You got to know when to hold them...and when to fold them.")

BUT I'll always do my best to minimize your risks and help preserve the most important portfolio there is: **yours**.

Here's an example of what I mean: **Stockgroup.com**. It made 21.04% for us in a year, before I dropped it six months before the Dot.com meltdown. Sure I was early selling out...but like Baron Rothschild, I always make money by selling too soon!

When it's all said and done **Global Investing's** track record speaks for itself.

So let me spell it out for you: Our savvy readers—year after year had a

chance to consistently pull in gains of **47%...66.58%...73%...169%...up to 310%** (and even higher.) I can go on and on, but you get the idea. So I need to ask you point blank: are you...

## **Ready To “Go Global” & Safely Double Your Investments Every 4 Years?**

I've never been more serious than I am right now. As a **Global Investing** reader you'll be privy to the global economic analysis...inside information...and the latest intelligence on the companies in our portfolios that I just mentioned.

**I give you all of this to insure you make those crucial decisions at the right time to make money on the winners...and avoid going bust on the losers.**

**Global Investing** is truly second to none and the longest running international investment newsletter on the market today! (Not bragging...just a fact)

And I'm proud to say that over the years we've built up an unbeatable set of portfolios of international stocks, bonds, ADRs (American Depositary Receipts), exchange-traded funds, and closed-end funds that—**on the average—have doubled in value every four years since 1990.**

Not too shabby, don't you think? And subscribers who got on board with some beauties like **Agnico Eagle** convertible (AEGGF) in Sept. '98 - have enjoyed a gain of 69.91% (plus a yield since this is a convertible share.)

When I investigate a company I look at the whole picture. And that includes the economies of that country and the international trends within that particular industry. That's why we recommended **DryShips** (DRYS-Q) a shipping company, at the end of 2005. It's given readers who participated with us a gain of 72.23% along with a 4.50% yield. (And yes, in case you're wondering...we're still holding it.)

Now, you're probably wondering, "Can I safely get in on the action here in America with these companies?" Absolutely! At just the click of your mouse...or a phone call, you can contact your local broker and have them execute any of the trades recommended in **Global Investing**. Yes, it's that simple!

Excited at what overseas investing can bring you? Well, I hope so. Let's now look at how you can build the portfolio that suits your investment needs.

## “A Buffet” of Seven Scrumptious Categories That Should Feed Your Investment Appetite

With **Global Investing** we don't believe “one size fits all” when it comes to reaping impressive gains. I think you'll agree that investors have their own financial goals and risk thresholds.

That's why I give you specific categories (whether you're a novice or a seasoned veteran) that are as “investor friendly” as possible. My recommendation is for you to choose your strategy and invest in many of my broad diversified stocks, bonds, and closed end funds – within your specific portfolio.

Please note: we are not “Wild West” traders.” **Global Investing** focuses on medium to long-term focused investing for exponential gains.

Here are the different portfolios you will have complete access too.

- **Buy and hold recommendation** is a long-term, non-risky stock producing investment that (often) has a dividend. It is not for trading.
- **Yield Portfolio** - for the investor who is seeking safe current income.
- **Speculative recommendations** are just that... “speculative.” These stocks are smaller and subject to losses, volatile, possibly having to be sold in a hurry or written off if something goes wrong. But in many instances there are exceptional gains to be made for the high risk/high reward folks who are not of the faint of heart.
- **Closed-end funds and exchange-traded funds** are mutual funds traded on stock exchanges inside the USA which invest outside the U.S. These funds are traded at a discount or premium to the net asset value of the shares in the funds' portfolio. They include real estate investment trusts.

(Also included in this portfolio are Canadian and Dutch entities which meet USA tax

rules for counting as closed end funds.)

- **County, Sector and Regional Funds** are among closed-end or exchange-traded funds that invest in a specific foreign country (Japan) or region (Europe) A sector fund invests in specific stocks that would likely benefit from a regime change (i.e. Cuba).
- **Gold fund** is a list of funds invested in gold or gold stocks.
- **Small cap and tech funds.** These investments are in small capitalization companies that are located in parts of the world such as Japan or Canada. And as the name implies has a tech element

Are your financial resources limited? Interested in conservatively diversifying your stock picks? If so, then you'll want to look into the tipping exchange funds in our portfolio.

They are The **Korea Fund** up **43%** and **The New Germany Fund** up **77%**. We also have two **Gold Funds** that we are holding (with no over lapping) that have given us returns of **54%**. No wonder **Global Investing** has delivered...

## Average Gains of 39.2%... And Has Easily Beaten Wilshire 5000

Sure, I could talk impressively about our track record. But I'd rather let others do that for me. According to the **Hulbert Financial Digest's** monitoring, **Global Investing portfolios** gained on average 39.2% over the last 12 months, more than double the 15.8% for the dividend-reinvested Wilshire 5000.

**But wait, there's more. Over the last five years, our portfolios appreciated on average at an annualized rate of 9.2%... vs. an annualized minus 1.6% for the DJ Wilshire.**

Still wondering if my expertise can help you diversify into overseas wealth?

Just listen to what other loyal subscribers say about Global Investing. (All are verifiable and on file.)

"Vivian, I have just finished my 1st year of your newsletter and have been extremely

pleased. I am always eager for the upcoming month and find many interesting investment ideas and ways to think about events. The newsletter also gives me confidence (such as in June) when the markets are going through a correction. The stocks in total have performed very well (over a 20% IRR) and more importantly (to me) they give my overall portfolio some diversification. Thanks..."

~ **M. G. - New York**

"By the way Teva and Taro doing nicely! Keep up the good work, and I hope you are in good health and good spirits."

~ **H.G. - Maryland**

"You're one of the sharpest knives in the drawer when it comes to international investing. Also, I really enjoy your writing style. It has your personality in it. So many newsletters are so dry."

~ **R. C. Washington State**

"I went ahead and bought the Sea Container bonds and YPF - at the \$22-\$23 price. It makes excellent sense and ought to be owned by everyone....Thanks for the tip. I look forward to a profitable association with my subscription."

~**A. B. - California**

"THANK YOU very much! As a new subscriber, I greatly appreciate your newsletter and believe that it will be a big help towards broadening my personal investments. I selected it after signing up for Hulbert's on-line service and doing some pertinent analysis of the newsletters they covered. I read your available back issues and have worked my way to the present."

Regards,

~ **M. G. - Florida**

So let me ask you: what do you think you'd expect to pay for a newsletter that pulls no punches and gives you the investment savvy to exponentially build a diverse international portfolio for years to come?

\$500 -- \$600? Hmmm...well, even at that price I think you'll agree that's a bargain, especially compared to the outrageous fees that big time Wall Street "money managers" and "financial advisors/salesmen" charge their clients.

**Not to mention that I guarantee you...here and now... they won't provide the proprietary information you'll receive with Global Investing.**

So before I tell you what this all costs, I want to share with you ...

## What To Expect Once You Make The Wise Choice of Joining Global Investing...

First, let me clarify: I will always be fair and straight with you. When you make the wise choice of joining other **Global Investing** loyal subscribers—you avoid getting bamboozled by pump-and-dumpers and (cough, cough, clears throat) “tainted analysts.”

**The same Wall Street analysts who get paid higher fees for recommending some funds over others.** So guess which ones they recommend? The ones their firms are pushing stocks or new funds their investment banks are underwriting (especially if they are not going well.) But wait... the plot thickens. These “advisors”

- may be trading stocks on behalf of house managed funds (or fat-cat pools) that are taking the exact opposite position to the one they are recommending to retail investors.
- have been caught trading based on out-of-date prices against the interests of their customers.
- have been caught writing upbeat stock advise about companies they think are garbage.

Not to mention they favor BIG CLIENTS over the mass of smaller investors in: initial public offerings, in pricing trades, in dispensing market-moving information.

What does this all mean to you? It means, the only people who pay us and whom I answer to---are YOU, my readers.

You see, my success is due to the relationship of trust that I’ve built up with them over the decades. This is precious why I want to keep in contact with you.

And the best way to do that, especially if you desire an update on specific stocks in our portfolio or you want my analysis on global markets... is to bookmark and take advantage of our user friendly **24/7 Member’s Only Secure Website.**

Use it and you can start building your international portfolio—the right way. Once you enter, you'll have complete access to our easy-to-read "meat and potatoes" part of **Global Investing**: our portfolio of recommendations.

Every month you'll receive (along with other savvy investors "who think out of the domestic box") a detailed chart analyzing each investment in our portfolios. You'll get our:

- entry price and current price (plus current yield if applicable)
- the gains of the stock (or bond) since we owned it
- and the appropriate action to take with that investment

Our model portfolio also has a section that shows our closed positions and what they have done.

At **Global Investing** we believe an informed investor makes a successful investor. Need more research to make an educated decision about particular recommendation?

Great! Then all you have to do is to click on the "more info" button to the right of that entry and you'll get the "who, what, where and why" of a particular stock, bond, or closed end fund that was recommended. But wait, there's more to your membership. You also get our...

- **Blog** – Here you receive my update on the overseas market and the economic activity that can affect the positions we hold. (No punches pulled here. You get the Good, The Bad, and The Ugly.)

(Have a burning financial question about a particular investment that applies to all our subscribers? Depending on the timing and space available I have in my daily blog, I'll likely answer you.)

- **E-mail** – Trade & News Alerts: Here I will alert subscribers to any changes in our model portfolio as they happen via our Trade Alerts. You will also receive News Alerts when we have a material development/analysis at one of our holdings to share.
- **Archives** – Feeling a little nostalgic? Then you can have complete access to past PDF issues of the Global Investing newsletter that date back to 2003.

Ready for more? Well, hold onto your hat because you also get **3 BONUSES**:

- **FREE ADR software tool** – This cutting edge software tool is a must for the serious investor. Now it's a snap to look up any ADR in the world. And you'll have three ways to search using either a keyword, country, or exchange. (VALUE \$150)
- **FREE Tutorial** – Need some hand holding on how to optimally use Global Investing to your advantage? Then take our tutorial which will go into detail and answer—from A to Z—about services PLUS answer all questions you could possibly have on how to optimally use it to make the money you want!
- **FREE Special Reports** –Periodically, we write special reports that are only available to subscribers.

## How To Subscribe For Less Than A Month of Starbuck's Coffee And Save Even More Money...

...and make this a complete "no brainer" for you. This is what I've arranged especially for new subscribers like you:

Subscribe for one full year and you'll get my in-depth over seas research for just \$299. (save \$100) Break it down and it comes out to a little less than \$25 a month.

Heavens, people spend more money on getting a caffeine buzz at Starbucks in a month then what you're going to pay for **Global Investing**. But I'm going to do you one better. Because you're a new subscriber you can take advantage of our two year subscription for the low price of only \$359. (save \$250)

BUT here's the problem: my new publisher has an itchy finger. Yep! He regularly examines the bottom line and what his competitors charge for their newsletters.

He knows the remarkable high value you're getting from **Global Investing** is way below what the market usually charges for this niche information. Not only that... but he's chomping at the bit—very shortly---to boost the price considerably higher. My advice? Jump on this opportunity and "lock and load" in this low price now (before the increase). And have no worries, because you have my personal...

## 100% "Iron Clad" Money Back Guarantee

So does this all feel right for you? I hope it does, because I want you to kick the tires...look under the hood and test drive my **Global Investing** for a FULL 30 days—on me.

Let's see if you and I are a good fit for each other. (I know the answer will

be yes) Simply take the tutorial...read the archives...examine the blogs...and most of all track-our-recommendations. If you're not thrilled with what I am delivering you (and I don't know how you couldn't be) then guess what?

Just contact customer service via e-mail and request a full "no questions' asked" refund before the 30 days are up. Your FREE REPORT, **Global Investing's Pharma Giants Vs. Generic Makers: Stocks That Will Pop and Stocks that will FLOP!** is yours to keep as my personal thanks for giving **Global Investing** an honest try.

One more incredibly important point: There's so much positive movement happening on the international investment horizon—and, yes, I want you to be part of it. BUT like anything else, we live and work in an expanding world market that can produce choppy and treacherous financial sea...which is why I hope you'll allow me to be your compass and help you navigate them properly.

**There's no doubt in my mind that subscribers who followed our analysis and recommended picks over the years have become wealthy with Global Investings' prudent approach to overseas investing.** But more importantly, it's not too late for you to join them and reap HUGE gains while SAFEGUARDING your portfolio from any domestic downturn.

If you've read this far that I believe you're the type of smart investor who "gets it!" I'm hoping you'll subscribe to **Global Investing** TODAY for what I believe will be very profitable rides that can undoubtedly TURBO CHARGE your investment future—starting today!

To higher and higher profits, I remain

Vivian Lewis

Editor, **Global Investing**

~ Since 1990 delivering impressive global returns~

PS: Know this: If you had joined **Global Investing** at the beginning of 2001, you could have benefited from our portfolios' average gain of 34.94% that year--while Wall Street was wallowing in the doldrums. (even after 9/11)

Even in our speculative portfolio we had an offshore oil rig company that since '98 has given us a 341% return. And here's the good news: you can still get into this stock and many others that we're following. There are three right

now that I believe can deliver some very impressive returns.

PPS: One last thing: undoubtedly my research can help save you a fortune... won't cost an arm and a leg... and can help you really sleep at night.
